ACTAtek Product Position

For Automated Access Control and Time Attendance providers

Who are dissatisfied with traditional access control and time clocks

Our product is a Linux web-based biometric and RFID card open system

- That supports all legacy card-based systems whilst allowing immediate integration with your IT and security systems and infrastructure
- Unlike products from Kronos, HID, Bioscrypt, Ingersoll Rand and Sagem
- We have assembled all the hardware and software interfaces needed for third-parties application integration with their existing IT and security systems

Distributor Scheme

We have a few selected non-exclusive distributors for each territory focusing upon different market verticals

Distributors will have their own installer/reseller/VAR network

Listed Distributor Price by Quantity

- Customer protection scheme per terms and conditions in distributor agreement, typically 3-6 months with monthly report update to ACTAtek
- Our pricing strategy allows distributor to make significant profit per unit
- Apart from the 12 months warranty, ACTAtek is the only biometric product offering extended 24 months and beyond warranty scheme allowing Distributor to make future profit

Training for Distributors

- | We provide free training of the ACTAtek system provided your personnel attend our 2 days training in one of our world-wide offices.
- | Distributor to bear all cost of the personnel sent for such training
- | For the first major multiple unit installation, we will send a support engineer to assist and train your staff to install the units

- ACTAtek will bear the air and accommodation of its engineer for this installation
- Many distributors' engineers will have no experience in IT technology, web-based systems and biometrics products
- It would be very expensive just to send your engineer to such commercially available course, ACTAtek doing it for FREE!

Revenue for Distributors

- | ACTAtek is design for durability and reliability in mind, hence the casing is IP65 certified
- | Pricing at less then US\$1 per user allows plenty of margin for distributor and its network
- | Our warranty scheme allows distributor to generate future recurring revenue whilst keeping them in contact with customers for further sales

- ACTAtek supports all legacy card-based system be it bar-code, HID, Proximity
- Distributor customers don't have to migrate over to ACTAtek immediately as the old and new system can co-exist until the old one is replaced
- ACTAtek is network ready and web-based, allowing customers to scale their installation generating further revenue for Distributor!

Tech Support for Distributors

- | ACTAtek Tech Support will call your appointed support engineer on a monthly basis to give them update and further information of how to use the product and its system software
 - | All bugs and feature request can be reported to support@actatek.com
 - | We have 24 hours coverage of the email sent to us
-
- Distributor can download all kind information, technical specification, marketing and promotional material from the Customer Support Centre on our website, www.actatek.com
 - Customised feature at a charge can be discussed
 - Unique tracking for all report file with ACTAtek
