GlobalRoam's core engine in cMask and gCross patent granted in Singapore

GlobalRoam Group Ltd proudly announces that, its wholly-owned subsidiary, GlobalRoam Pte Ltd has secured its core engine in cMask and gCross service patent: "System and Method for Providing a Service" which was granted in Singapore on 31st October 2008 by the Registry Of Patents, Singapore in accordance with section 35 of the Patents Act. Patent of "System and Method for Providing a Service" is an invention with National University of Singapore (NUS) as the proprietor of the patent.

System and Method for Providing a Service is an invention idea that covers the mapping engine behind GlobalRoam's cMask and gCross technology. cMask allows privacy and safe mode of communication for users. With cMask, users are able to control by whom and when they can be reached, at the same time maintain their number private when they contact others. gCross's strength lies in its ability to allow users to be contactable by anyone, anywhere in the world without hefty IDD charges.

The granting of this patent will allow GlobalRoam Pte Ltd the rights to prevent or exclude others in Singapore from making, using, selling, offering to sell or importing the invention.

Currently GlobalRoam has applied for the grant of this patent for various countries which include Europe, US, Malaysia, India, Australia, Canada, Korea, Hongkong, China, and Indonesia. India and Malaysia will be the next countries that are coming up in the pipeline to be granted a patent.

About GlobalRoam Group Limited
